

Window into the Future

Technology

- 1 **Renewable energy capable glass** embedded with solar cells. Fully customizable colors and texture finishes to satisfy architectural needs. The glass can also be fitted with fully transparent solar cells.
- 2 **Conventional vision glass** that does not generate any renewable energy.

Renewable Energy Glass	Spandrel/Colored	Clear Vision
Solar Power Capacity	60Wp - 200Wp	40Wp - 85Wp
Connectors	MC4	MC4
Cell Type	Monocrystalline or Polycrystalline	Monocrystalline or Polycrystalline
Number of cells	8 - 24	Fully customizable
Thickness	½ inch minimum	1-inch minimum IGU
Panel Size	Fully customizable	Fully customizable
Transparency	0 - 35% dependent on color and pattern selection	Fully transparent
